SUMMARY

Data and AI Engineer with hands-on consulting experience at Deloitte in data migration, business intelligence, and ERP systems, combined with end-to-end UX design expertise in Figma. Proficient in SQL, Tableau, Oracle ERP Cloud, and full-stack development, with a proven ability to deliver data-driven insights and user-centered solutions across complex, cross-functional projects.

EDUCATION

Northeastern University, Boston, MA **September 2024 - April 2026**
Master of Science in Information Systems

G. Narayanamma Institute of Technology and Science, Hyderabad, IN **August 2019 - May 2023**
Bachelor of Technology in Information Technology

TECHNICAL SKILLS

Languages / Databases: Python(Pandas, NumPy, Matplotlib), Jupyter Notebook, Java, SQL (MySQL, Oracle SQL), NoSQL (MongoDB)

ERP and Reporting: Oracle ERP Cloud, File-Based Data Import (FBDI), BI Reporting Tools, Tableau, Data Analysis, Business Process Analysis

AI-Assisted Tools: GitHub Copilot, ChatGPT, Cursor, Claude, Antigravity (for code generation, data exploration, and technical documentation)

Web Development: HTML, CSS, JavaScript, Bootstrap, NodeJS, ReactJS, Express, Vite, TypeScript

Design and Tools: UI/UX Design, Figma, Adobe XD, User Research, Usability Testing, Visual Design, Interaction Design, Wireframing, Prototyping

Tools and Frameworks: Git, GitHub, Apache NetBeans, VS Code, MS Excel, MS Word, PowerPoint, MS Office, Azure Data Studio, Linux

PROFESSIONAL EXPERIENCE

Deloitte, Hyderabad, IN **October 2023 - June 2024**
Data Consulting Analyst

- Led end-to-end data migration across multiple Oracle Fusion Cloud modules, including WMS, Sales Orders, and BPA, using File-Based Data Import (FBDI), ensuring high accuracy through structured analysis, validation, and reconciliation of source and target records
- Automated BI Publisher reports using SQL queries and ERP dashboards to streamline reporting workflows, significantly reducing manual reconciliation effort and improving reporting turnaround time across the project team
- Resolved data discrepancies across cross-functional teams using root cause analysis, implementing corrective measures that improved overall ERP integration reliability and reduced recurring data quality issues
- Designed and validated transformation logic and mapping documentation across large-scale migration scripts, identifying and bridging data structure gaps between Oracle Fusion and legacy systems to consistently produce clean and accurate outputs
- Monitored and validated post-migration data integrity using SQL, Excel, and ERP dashboards, performing comprehensive checks to support on-time project delivery and ensure a clean, fully reconciled handoff to the client

PROJECTS

Job Tracker
React, TypeScript, Vite, Python FastAPI, Agentic AI, LLMs (Link)

- Built a full-stack application tracking system with integrated analytics dashboards to visualize application metrics, status progression, and timeline trends, translating user requirements into functional features including deadline monitoring and interview scheduling
- Integrated AI resume parser using AGNO framework with React frontend (upload, scoring, chat interface), and added custom AI tools to provide conversational coaching and personalized ATS optimization recommendations based on job description analysis

Property Management System
SQL Server, Azure Data Studio, Node.js, React (Link)

- Implemented a normalized SQL Server database with stored procedures, triggers, and user-defined functions (UDFs) to manage properties, tenants, leases, maintenance, requests, and payments, eliminating data redundancy through structured ER design
- Developed RESTful APIs using Node.js and Express to support complex CRUD operations, automate workflows, and enable real-time analytics across a fully integrated full-stack system, reducing manual data handling and improving overall system responsiveness

LingoQuest
Language Learning Mobile App, Figma (Link)

- Designed a scenario-based language learning app in Figma using interactive storytelling and gamification mechanics to improve practical communication skills through real-world context, resulting in a more intuitive and motivating learning experience
- Conducted end-to-end UX research, including usability testing, JTBD framework analysis, and SUS scoring, iterating on high-fidelity prototypes to refine navigation, clarify key user flows, feedback loops, and enhance progress tracking

AptEase
Rental and Roommate Matching App, Figma, Behance (Link)

- Created a comprehensive rental and roommate-matching app in Figma, leveraging user personas, empathy maps, and end-to-end journey flows, simplifying the apartment search process and improving compatibility matching between potential roommates
- Delivered high-fidelity interactive wireframes and clickable prototypes, resulting in improved design coherence and a more intuitive, seamless experience across the full user journey from onboarding to final roommate selection
